Adversity, Relationships and Psychologically Informed Environments

Dr. Adam Burley
Consultant Clinical Psychologist

NHS Lothian Psychotherapy Department
“They are casting their problems at society. And, you know, there's no such thing as society. There are individual men and women and there are families. And no government can do anything except through people, and people must look after themselves first.”

*Margaret Thatcher (1987)*
Odds Ratio

Number of ACEs

Heart disease
COPD
Self-report alcohol problems
Psychotropic medicine use
Lifetime hallucinations
Lifetime attempted suicide
Liver disease
Lung cancer
Women with >30 sexual partners
Lifetime depression in women
Lifetime attempted suicide
Preventing ACEs in future generations could reduce levels of:

- Heroin/crack cocaine use (lifetime) by 66%
- Incarceration (lifetime) by 65%
- Violence perpetration (past year) by 60%
- Violence victimisation (past year) by 57%
- Cannabis use (lifetime) by 42%
- Unintended teen pregnancy by 41%
- High-risk drinking (current) by 35%
- Early sex (before age 16) by 31%
- Smoking tobacco or e-cigarettes (current) by 24%
- Poor diet (current; <2 fruit & veg portions daily) by 16%
Experiencing four or more ACE’s makes someone.....

• 3x more likely to have attended A&E in the last month
• 4x more likely to have experienced depression
• 32x more likely to have had an STI
• 5x more likely to be mother before eighteenth birthday
• 4x more likely to be unemployed
• 10x more likely to have hit someone in the last month
• 6x more likely to have used heroin or cocaine

• 12x more likely to have tried to commit suicide
‘There is no such thing as a baby.’

D. Winnicott (1957)

Relationships define health
The Internal World.
The Emotional Experience.
Why?

Psychological Conflicts.

‘The relations with carers are characteristic; they are characterized by the defeat of help.’

R. Hinshelwood (2002)
Why?

Comprehension conflicts.

‘When a young person is to be found running down the street smashing windows, he is looking for his mother.’

D. Winnicott (1949)
Engagement
Content and Process
Multiple and Complex Needs
Multiple and Complex Needs

- Young female living in supported accommodation.
- Dependent on carers for basic ADL’s
- Splits carers.
- ‘Engages’ with support in a variety of, often challenging, ways.
- At times very demanding, at other times totally self reliant.
- Range of challenging behaviour in relation to eating, conduct.
- Highly, highly emotionally labile.
- Occasionally aggressive and violent.
- Evokes very strong extremes of emotion in carers.
- Called ‘bonkers’ by other residents.
- Very volatile relationships with friends.
- Range of addictions.
Complex Presentation ≠ Complex Intervention
‘There is no such thing as an employee.’

Employment is fundamentally relational.
HISTORIC CLAIMS

You are going to make a lot of bad choices in your life - choosing the wrong parents, the wrong socio-economic group, and the wrong social welfare home, where you are going to get yourself abused. After that you are just going to carry on making bad choices till you end up in prison. Or a psych ward.

When are you going to take some responsibility for yourself?
